-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-20 and 22-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Streich et al. (U.S. 5,289,933) in view of Scherb (U.S. 5,259,523). Streich et al. teaches a container with a base 1, a cover 6, supporting parts 5, 10, jointing elements at 14, and positioning elements at 15. Streich et al. does not teach the connecting element. Scherb teaches that it is known to provide a collapsible container with connecting elements (see elements 78). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the collapsible container of Streich et al. with the connecting elements of Scherb, in order to accommodate and tension strap.
4. Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Streich et al. (U.S. 5,289,933) in view of Scherb (U.S. 5,259,523), as applied to claim 19 above, and further in view of Silverman (U.S. 3,138,398). The modified container of Streich et al. discloses the claimed invention except for the base comprising connecting rods or pipes. Silverman teaches that it is known to provide a base which comprises connecting rods or pipes (see figure 1). It would have been obvious to one having

ordinary skill in the art at the time the invention was made to provide the modified container of Streich et al. with the base comprising connecting rods or pipes, in order to allow the base to be disassembled.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The prior art is cited for the cover and base.

6. THIS ACTION IN NON-FINAL.
